Animal Specialty Group is renowned for its open, collaborative approach to partnering with referring veterinarians. Operating as an extension of the primary care veterinarian’s practice, Animal Specialty Group provides referring veterinarians with access to sophisticated, leading edge resources, plus timely patient information and full participatory consultation throughout the treatment process.

Our Specialties:

- Internal Medicine
- Emergency/Critical Care
- Physical Rehabilitation and Alternative Medicine
- Surgery
- Diagnostic Imaging
- Oncology
- Neurology
- 7 specialties, 1 perfect partner for you

For more details regarding any of these services, please call or visit our website.

Internal Medicine

Phlegm, a frequent problem in elderly cats, can affect their quality of life. It is important to properly diagnose the cause of phlegm and treat it appropriately. Regular veterinary check-ups and proper dietary management can help prevent and manage this common issue. It’s what’s on the inside that counts.

**CONDITIONS TREATED:**

The Internal Medicine specialists at Animal Specialty Group are highly qualified and skilled in the prevention, diagnosis, and treatment of complicated disorders. State-of-the-art equipment and techniques, as well as new advances in the field of medicine enable our internists to provide the best care possible and give you (and your clients) the answers you need.

Our unwavering commitment to you and your patient is what drives our efforts. Because at Animal Specialty Group, we firmly believe that the referring veterinarian is one of the key members on every team. Backed by our broad range of board-certified specialists, we work together with you to ensure that both you and your patient receive the absolute best possible care.

We've made scheduling an internal medicine consultation as simple as possible. Just give us a call, fax us a completed referral form (available for download), or fill out the referral form directly online.

Visit us at www.ASGvets.com for all of your referral options.

A referral process that’s dedicated to you.

The most modern imaging technology is an important part of advanced diagnostics.

Our Internal Medicine Specialist Team...

Internal Medicine’s team of exceptionally qualified specialists has your whole patient covered, from endocrinology and gastroenterology to respiratory disorders.

The ASG collaborative approach

Animal Specialty Group was founded as a surgical referral hospital, designed around the concept that specialists, family veterinarians, and pet owners working together can do more for our patients than any of us working alone. That spirit of collaboration lives on today throughout ASG. Our internists work with you, and with each other, to get to the bottom of difficult cases. And when another opinion is needed, from an oncologist, neurologist, radiologist, or surgeon, those colleagues are right down the hall, ready to lend their expertise to help solve your patient’s problem.
